Proposed Alternatives

01 Naturalized Creek

- Lower land north of Ballona Creek
- Create earthen levees around northern perimeter of the Reserve and north of Culver Blvd
- Remove armored Ballona Creek levees, realign to be a more natural, sinuous channel, and reconnect the channel to the marshplain
- Create and enhance wetland and upland habitats throughout the Reserve
- Install new trails, bike paths, gateways, educational and art features
- Improve existing parking areas

02 Partial Naturalized Creek

- Lower land north of Ballona Creek
- Create earthen levees around northern perimeter of the Reserve and north of Culver Blvd, to west of the junction with Jefferson Blvd and to the south Creek levee
- Remove armored Ballona Creek levees, realign to be a more natural, sinuous channel, and reconnect the channel to the marshplain
- Create and enhance wetland and upland habitats to a lesser extent than Alt 1
- Install new trails, bike paths, gateways, educational and art features
- Improve existing parking areas

03 Area A Oxbow

- Lower land north of Ballona Creek
- Create earthen levee along the northern (Fiji Way) perimeter of the Reserve
- Create culverts along northern armored Ballona Creek levee in two places
- Create and enhance wetland and upland habitats north of Ballona Creek from the Marina Freeway to the west end of Fiji Way
- Install new trails, bike paths, educational and art features
- Improve existing parking areas

04 No Project

The Reserve stays in its current impaired state and under existing management policies.

*All of the above artistic renderings are representations of the Alternatives. They are designed to help give an idea of what the restoration may look like, not an exact representation of the end result.*
